**Key:** **LOR** = Limit of reporting represents the standard LOR for the respective parameters in each method. Note that limits of reporting may be affected if, e.g. additional dilution was required because of matrix effects, or the sample quantity was limited.

**MU** = Measurement Uncertainty

\* = Symbol succeeding any result indicates laboratory or subcontractor non-accredited test.

### Measurement Uncertainty:

*The uncertainty is given as extended uncertainty (according to the definition in "Guide to the Expression of Measurement", JCGM 100:2008 Corrected version 2010) calculated with a coverage factor of 2, which give level of approximately 95%.*

*Measurement of uncertainty is reported only for detected substances with levels above the reporting limits.*

*The uncertainty from subcontractors is often given as extended uncertainty calculated with a coverage factor of 2. Contact the laboratory for further information.*
